Chemical Only Pool Service

Objective: To sanitize pool and maintain water balance

Service Provided:

A. The following chemicals are tested and adjusted at no extra cost:

- ✓ Chlorine – performed weekly
- ✓ pH – performed weekly
- ✓ Total Alkalinity – performed weekly
- ✓ Cyanuric Acid – Spring, Mid-Summer and as needed
- ✓ Calcium Hardness – Spring, early winter and as needed

B.

- ✓ Pool water clarity
- ✓ Sanitation and control of bacteria in pool water
- ✓ Treatment of all types of algae (**See note A**)

*Note: Filter cleans are not included. The cost will be an additional \$45.00 for cartridge filters.

D.E. filters are an additional \$65.00 to disassemble, clean, reassemble, and recharge.

Note A: Chemicals alone will not completely prevent algae growth. The homeowner must run the filter daily, generally 8 hours during warmer months and 4 hours during winter. Regular cleaning and brushing of the pool, keeping the surrounding vegetation and/or dirt out of the pool, along with regular filter cleanings, phosphate treatments and daily filtration is essential in the prevention of algae. Phosphate treatments cost extra. Salt pools will be charged once a year for salt at end of rainy season.

Weekly service is provided 48 weeks per year. Thanksgiving and Christmas week's service will not be provided in observance of the holiday season as well as all other major holidays.
